

# ART TABLE INSTRUCTIONS

MODEL # 08402

## Wood Parts Included:

- 1- Paper roll dowel
- 2- Tray mounting bars
- 1- Paint tray
- 1- Pre-assembled art surface
- 4- Table legs (2 drilled to hold paper roll)

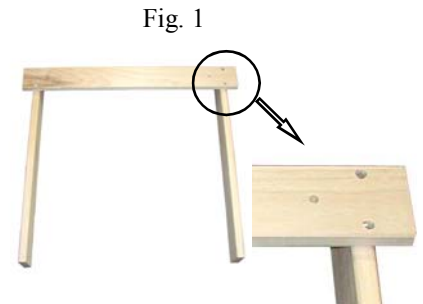

## Hardware Included:

- 2- 2" Carriage bolts
- 4- Washers
- 2- Wing nuts
- 2- Brass screws
- 2- Retainer buttons
- 16- # 10 X 1 1/4" wood screws

Your table is shipped with the art surface and paper guides/cutters attached to the two table top support bars. The remaining assembly steps are described here. This should take only a few minutes, and requires a phillips screwdriver.

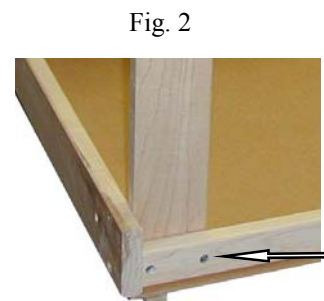

**Step 1)** Attach the two legs drilled to hold the paper roll dowel, to a tray mounting bar using 4 -1 1/4" screws. Be sure the countersunk holes on the mounting bar are on top, as shown (figure 1). Do not fully tighten the screws.

**Step 2)** Repeat with the second pair of legs (not drilled for the paper roll dowel) and the other mounting bar.

**Step 3)** Place the table top upside down on a cloth (to protect the top of the art surface and your floor from scratches).

**Step 4)** Position and attach assembled leg sets to the table top support bars using the 8 remaining screws (figure 2). Again, do not fully tighten the screws.

**Step 5)** Carefully turn the table right side up (figure 3), place it on a level surface, then tighten all 16 screws. Do not over-tighten, as this may strip out the threads in the legs or crack the wood.

Fig. 3

**Step 6)** Attach the paint tray to one of the tray mounting bars, using the 2” carriage bolts. Place washers between the tray and tray support bar on each bolt to act as a spacer between the tray and the tray support bar (paper will go through the space provided). Secure each bolt with a washer and wing nut on the inside of the mounting bar.

**Step 7)** Attach the two dowel retainer buttons on the outside of the legs by passing a brass screw through each retainer button and into the predrilled screw holes. The screw head should fit flush into the recessed portion of the retainer button (figure 4).

Fig. 4

**Step 8)** Slide the paper roll support dowel through the predrilled dowel hole of one leg, then through the optional paper roll, and finally into the predrilled hole of the opposite leg (figure 5). To lock paper roll dowel in place simply turn retainer buttons so they cover the dowel holes (figure 6).

Fig. 6

**Step 9)** Pull the paper up between the paint tray and the paint tray support bar and slide the paper under the paper guides/cutters (figures 7 & 8).

**Please Note:**

**The art table is made of high-quality natural hard maple. The table’s top is a white wipe-off marker surface. Be sure to test markers on a corner to ensure easy erasure before allowing general use (markers are not all created equal!). Clean the entire surface regularly. Marker stains may be removed with special white board cleaners. Never use abrasive household cleaners, which may damage the surface.**
