

IMAGINATION STARTS HERE

**Parts:**

- 4 Side Uprights (38" long pcs)
- 2 Beams (pieces with plastic teeth)
- 1 Optional Support Beam (same as beam w/ no teeth)
- 2 Feet
- 8 Positioning Blocks (5" long pcs)
- 2 Assembly Hardware Packs:
  - 12 - 1-1/2" wood screws
  - 20 sets of bolts, washers & wing nuts
- 2 Pickup Sticks
- 2 Shuttles

**Assembly Instructions:**

**Step 1)**

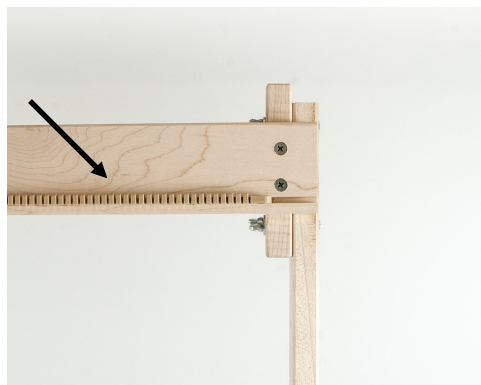

Use wood screws to attach a Positioning Block to the end of each Beam.

**Step 2)**

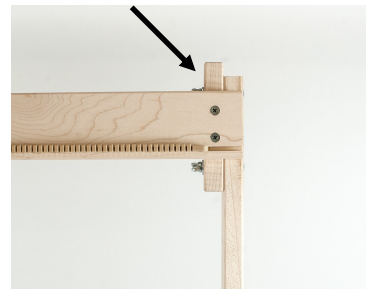

Use bolts to connect uprights in pairs; connect uprights so the two sets are the same length. Secure with washers and wing nuts.

**Step 3)**

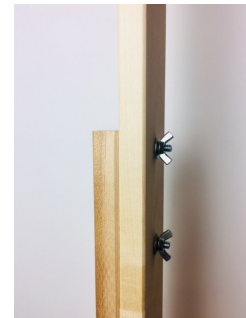

Lay uprights on a table or floor and attach beams; use bolts to connect positioning blocks to uprights. Orient beams so teeth are close to the center of the loom; teeth are on the lower edge of the top beam and the top edge of the bottom beam.

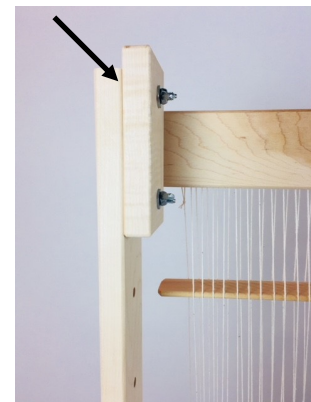

Step 1

Step 2

Step 3

#### Step 4)

Attach each beam at the level you choose for the project size you want.

Depending on the position of the lower beam:

- extra positioning blocks (included) may be needed as spacers
- extra bolts (included) may be used to connect uprights securely

Step 4

#### Step 5)

Attach feet to bottom of each set of uprights; secure with washers and wing nuts.

#### Step 6)

Using the optional support beam (a cross beam w/ no plastic teeth) will add extra stability to your Grizzly, which may be helpful when using the loom at it's full height.

When attaching the extra support beam, orient it toward the back of the loom to avoid any interference with your weaving. Follow the same steps used to attach the two beams in step 4.

-Regularly check all hardware to keep tight.

#### ENJOY!!!

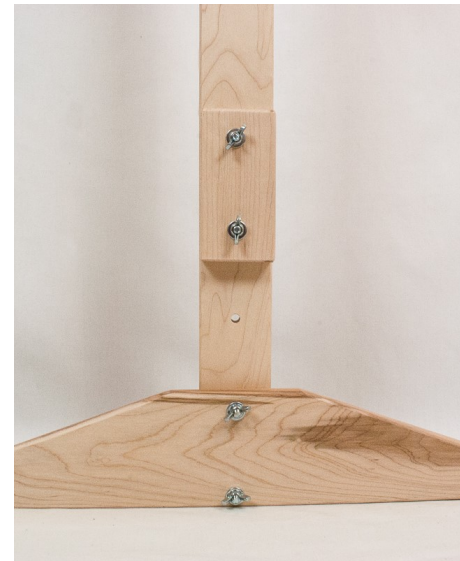

Use the loom standing upright on the floor or on a table top.

-To remove a finished project, remove the bolts holding one of the beams in place. Slide your finished weaving off the beam teeth.
